Improving outcomes:

high aspirations and expectations for children with SEN

5.1 All children are entitled to an education that enables them to:

• achieve the best possible educational and other outcomes, and
• become confident young children with a growing ability to communicate their own views and ready to make the transition into compulsory education

5.2 Providers of early years education, that is all early years providers in the maintained, private, voluntary and independent sectors that a local authority funds, are required to have regard to this Code including the principles set out in Chapter 1.

5.3 The Early Years Foundation Stage (EYFS) is the statutory framework for children aged 0 to 5 years. All early years providers must follow the safeguarding and welfare requirements of the EYFS and the learning and development requirements, unless an exemption from these has been granted.

5.4 Providers must have arrangements in place to support children with SEN or disabilities. These arrangements should include a clear approach to identifying and responding to SEN. The benefits of early identification are widely recognised – identifying need at the earliest point, and then making effective provision, improves long-term outcomes for children.

5.5 All those who work with young children should be alert to emerging difficulties and respond early. In particular, parents know their children best and it is important that all practitioners listen and understand when parents express concerns about their child’s development. They should also listen to and address any concerns raised by children themselves.

They must also prepare a report on:

• the implementation of their SEN policy
• their arrangements for the admission of disabled children
• the steps being taken to prevent disabled children from being treated less favourably than others
• the facilities provided to enable access to the school for disabled children.

Special educational needs and disability code of practice: 0 to 25 years (2014)
Revised January 2015
• their accessibility plan showing how they plan to improve access over time

5.7 Early years providers must provide information for parents on how they support children with SEN and disabilities, and should regularly review and evaluate the quality and breadth of the support they offer or can access for children with SEN or disabilities. Maintained nursery schools and all providers of relevant early education to children with SEN must co-operate with the local authority in reviewing the provision that is available locally (see Chapter 3), and in developing the Local Offer (see Chapter 4). Providers should work in partnership with other local education providers to explore how different types of need can be met most effectively. (revised statement Jan 2015)

5.8 Local authorities must ensure that all providers they fund in the maintained, private, voluntary and independent sectors are aware of the requirement on them to have regard to the SEN Code of Practice and to meet the needs of children with SEN and disabilities. When securing funded early education for two-, three- and four-year-olds local authorities should promote equality and inclusion for children with disabilities or SEN. This includes removing barriers that prevent children accessing early education and working with parents to give each child support to fulfil their potential.

5.9 Where assessment indicates that support from specialist services is required, it is important that children receive it as quickly as possible. Joint commissioning arrangements should seek to ensure that there are sufficient services to meet the likely need in an area (Chapter 3, Working together across Education, Health and Care for joint outcomes). The Local Offer should set out clearly what support is available from different services, including early years, and how it can be accessed.
